## PROFILE

---

Student with hands-on experience from hackathons, focusing on frontend development and exploring blockchain applications. Passionate about building user-centered solutions and eager to apply skills in real-world projects that combine innovative technology with practical impact

## PROJECTS

---

### Onpay - Seamless Payment App

- Developed a responsive web application using **Next.js** with **TailwindCSS** and **Shadcn UI** for modern, consistent styling.
- Implemented form handling with **React Hook Form** and **Zod** for robust validation and improved user experience.
- Optimized data fetching and caching with **React Query**, enhancing performance and responsiveness.
- Integrated **blockchain APIs** to track user spending, earnings, and recent transactions in real time.

### LinkFi - Stripe 2.0 using blockchain services

- Built the entire frontend with **Tanstack Router**, **Tailwind** for the styling, **Shadcn** for the components
- Created intuitive payment flows and analytics dashboard with **Chart.js**
- Integrated **Thirdweb** SDK for cross-chain wallet connections
- Used **Supabase** for the database

### Betcha - Strava based challenge with friends

- Led frontend development with **React**
- Integrated **RainbowKit** for multi-wallet connectivity
- Built bet creation forms with **React Hook Form** & **Zod** validation
- Implemented real-time tracking with **React Query**

## EDUCATION

---

Asia University

2023 - 2027

Bachelor of Computer Science and Information Engineering
